

Agreement to participate in the SAPHIRES collaboration

SAPHIRES collaborators are required to accept the basic principles prescribed in the declaration of formation of the SAPHIRES collaboration and significantly contribute to experimental activities in many aspects and must observe current and future collaboration-wide provisions on various topics (e.g., assigning authorship, taking experimental shifts, accepting speaking opportunities, and protecting confidential information) independently of any circumstances at individual institutions.

The undersigned agree to participate in the SAPHIRES collaboration as described above.
